Make your phone easier to see and hear

Five free settings that are already on your phone. Tick each one off as you go.

1 AA Make the text bigger

☐ Done

Makes the writing bigger in messages, emails, websites and most apps.

IPHONE

1. Open **Settings**
2. Tap **Display & Brightness**, then **Text Size**
3. Drag the slider to the right until it's easy to read

ANDROID

1. Open **Settings**
2. Tap **Display**, then **Font size** (on Samsung: **Font size and style**)
3. Drag the slider to the right

2 B Make the text bold

☐ Done

Thicker letters stand out more, which helps a lot if your eyesight isn't what it was.

IPHONE

1. **Settings** > **Display & Brightness**
2. Turn on **Bold Text**

ANDROID

1. **Settings** > **Display**
2. Turn on **Bold text** (on Samsung it's in **Font size and style**)

3 Stop the screen going dark so quickly

☐ Done

Gives you more time to read before the screen switches off and locks.

IPHONE

1. **Settings** > **Display & Brightness**
2. Tap **Auto-Lock** and choose **5 minutes**

ANDROID

1. **Settings** > **Display**
2. Tap **Screen timeout** and choose **5 minutes**

Turn over for 2 more: the magnifier and a louder ring →

4 Use your phone as a magnifying glass

☐ Done

Point the camera at small print, like a menu, a bill or the label on your tablets, and zoom in.

IPHONE

1. Swipe down in the middle of the Home Screen and type **Magnifier**
2. Open it and point it at the writing
3. Drag the slider to zoom. Tap the torch in dim light

ANDROID

1. Swipe up to see all your apps and search for **Magnifier**
2. If there isn't one, open the **Camera** and spread two fingers on the screen to zoom

5 Make it ring louder

☐ Done

So you don't miss calls from family, the doctor or the hospital.

IPHONE

1. **Settings** > **Sounds & Haptics**
2. Drag **Ringtone and Alert Volume** to the right
3. Check the switch on the side isn't on silent (orange showing)

ANDROID

1. **Settings** > **Sound** (on Samsung: **Sounds and vibration**)
2. Tap **Volume** and drag **Ring** to the right

Still can't hear it ring? A little moon symbol at the top of the screen means **Do Not Disturb** is on, which silences calls. Swipe down from the top of the screen and tap the moon to turn it off.

Want a flash as well as a ring? Your phone can flash a light when a call or message comes in. iPhone: **Settings > Accessibility > Audio & Visual > Flash for Alerts**. Android: **Settings > Accessibility > Flash notifications**.

Practise this on a pretend phone, for free
