Keep your phone safe

Five free settings that protect your phone, your money and your photos.

1 Lock your phone

☐ Done

A PIN, your face or your fingerprint stops anyone else getting into it.

IPHONE

1. **Settings** > **Face ID & Passcode** (or **Touch ID & Passcode**)
2. Tap **Turn Passcode On** and choose 6 numbers

ANDROID

1. **Settings** > **Security** (on Samsung: **Lock screen**)
2. Tap **Screen lock** and choose **PIN**

2 Turn on automatic updates

☐ Done

Updates are free and fix the holes scammers use. Let the phone do them overnight.

IPHONE

1. **Settings** > **General** > **Software Update**
2. Tap **Automatic Updates** and turn everything on

ANDROID

1. **Settings** > **Software update** (or **System** > **Software updates**)
2. Turn on automatic download over Wi-Fi

3 Turn on Find My

☐ Done

If it's lost or stolen, you can see where it is, make it ring, or lock it.

IPHONE

1. **Settings** > your name > **Find My**
2. Tap **Find My iPhone** and turn it on

ANDROID

1. **Settings** > **Google** > **Find My Device** (or **Find Hub**)
2. Make sure it's turned on

Turn over for 2 more: backing up your photos and your medical ID →

4 Back up your photos

☐ Done

If the phone breaks or gets lost, your photos are kept safe online and come back on a new phone.

IPHONE

1. **Settings** > your name > **iCloud** > **Photos**
2. Turn on **Sync this iPhone**

ANDROID

1. Open **Google Photos**
2. Tap your picture at the top, then **Turn on backup**

Both have free storage to start with, and may ask you to pay for more if you have lots of photos.

5 Add your medical ID

☐ Done

Paramedics can see your conditions, medicines and who to call, without unlocking your phone.

IPHONE

1. Open the **Health** app
2. Tap your picture, then **Medical ID** > **Edit**
3. Turn on **Show When Locked**

ANDROID

1. **Settings** > **Safety & emergency**
2. Tap **Medical information** and fill it in

Never tell anyone your PIN, or a code sent to your phone by text. Your bank, Apple, Google and the police will never ask for them.

Practise these on a pretend phone, for free

Scan the code, or go to **jamesgartshore.co.uk/go/safe**

Menu names can differ slightly between phone makes and updates. Free tips and drop-in help: jamesgartshore.co.uk
